

iTank i310 Series

The next generation.

Innovative & solid architecture

Built solid, the i310 provides exceptional protection to the hard drive enclosed. Its fan-less design and aluminum built body dissipates heat faster for you to work quietly and comfortably.

Available in USB 3.0

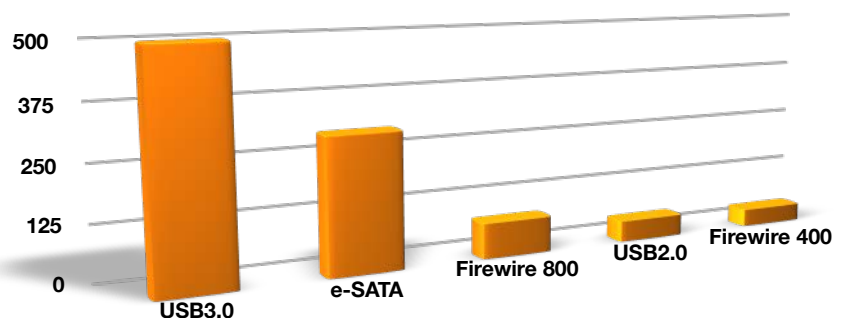

The new iTANK i310 is now USB 3.0 (model i310-SB3 & i310-WBS3) technology ready for greater throughput performance than USB 2.0 and FireWire 800. For those who have not yet have the USB 3.0 host connectivity on your computer system, the USB 3.0 is also backward compatible to the USB 2.0 connectivity.

Note: If connected to USB 2.0 host, the performance speed will only reach that of USB 2.0.

Multi interface connections

Quadruple connections including eSATA, FireWire 800, FireWire 400 and USB2.0 / USB3.0, model i310-WBS2 & i310-WBS3, available that provides great usage flexibility across different computer platforms.

Removability for multiple drive access

The i310 comes equipped with removable drive tray for drive swap so you can access the data in different drives with ease. Both the silver and the black trays are structurally the same, therefore, are compatible to all Stardom 3.5" enclosures.

Spare removable drive tray available

The Stardom removable 3.5" drive trays are designed to fit any 3.5" SATA or SAS hard drive for swapping. Each also comes with protective casing that well protects the drive enclosed when archiving and mobility is required. The removable 3.5" drive tray comes in two versions, the silver and the black and both are interchangeable to fit all Stardom 3.5" drive enclosures.

i310 series is the perfect high-performance solution for storage intensive applications including audio/video editing, digital photography and high-speed data backup.

It's Time Machine friendly !

Yes! The iTANK i310 is capable of supporting the Time Machine included in the Mac OS X Leopard. Through any interface connections provided by the i310, all of your Time Machines files can be backed up speedily (HFS+ drive format required).

Move your photo library on Mac

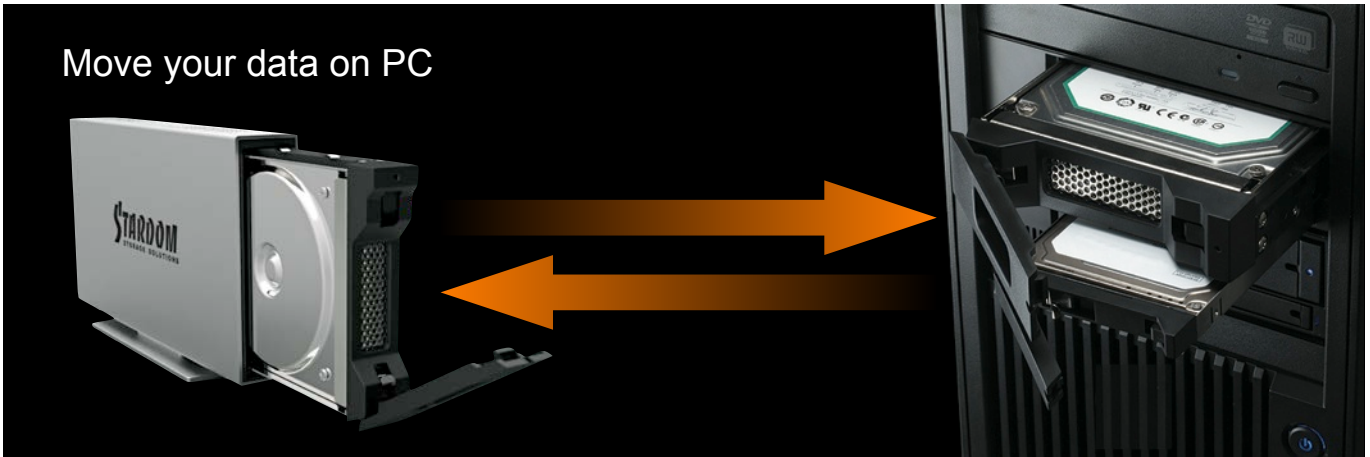

For the features described above, hard disk removal can be supported only when the JBOD (Independent volume) function is used.

Never run out of hard drive space.

As your iPhoto library grows, it may become too big to store on your computer's hard drive. Aperture lets you set up as many external drives as you want and specify where to store each of your photos — without changing anything in your Aperture library. You can access and edit your photos the way you usually do, no matter where the originals are stored. This feature also allows you to add hard drives one at a time, whenever you need them. So your setup can grow along with your library.

Move your data on PC

For a wide range of applications

The iTANK i310 is designed for a wide range of usages from data, MP3, MPEG archiving to creative professional applications such as audio, video and photography productions.

Specification

Model No	i310-WBS3	i310-WBS2	i310-SB3	i310-SB2
Interfaces	Firewire 800 (1394b) x 2 Firewire 400 (1394a) x 1 e-SATA x 1 USB3.0 x 1	Firewire 800 (1394b) x 2 Firewire 400 (1394a) x 1 e-SATA x 1 USB2.0 x 1	e-SATA x 1 USB3.0 x 1	e-SATA x 1 USB2.0 x 1
Compatible Drives	3.5" SATA III (6.0 Gbits) HDD			
Storage Mode	Independent volume	Independent volume	Independent volume	Independent volume
Maximum Capacity	3TB	2TB	3TB	2TB
Dimension	50 mm (W) x 131 mm (H) x 224 mm (D)
